Instruction Card

Soothing Eye Pillow

- Instructions -

Cool in the freezer

Great to relieve eye tension, headaches, fever, and to help reduce swelling from puffy eyes (due to lack of sleep or as a result of tear-filled eyes). Place in freezer for about 20 minutes before use, or keep in freezer between each use. (Use Ziplock)

Any time use

These eye pillows can be enjoyable just as they are, without warming or cooling. Place them over your eyes anytime and breathe in to relax, relieve stress and help encourage restful sleep.

Warm in the microwave

Great to also help calm and rest the mind and for relaxation. The warming will strengthen the lavender scent for wonderful therapeutic aromatherapy.

Warm in microwave in 15 second intervals. Do not let it get too hot. Rotate sides when heating up. Be cautious of getting your eyes too warm, or burning the fabric in the microwave. (Use a thin tissue over the eyes to prevent mask from cosmetic stains.) Clean with damp cloth!
